Forwards Teaching Team

<http://forwards.github.io/>

@R_Forwards

Outline

9:00 - 10:30 make code into an R package

11:00 - 12:30 do collaborative coding with GitHub

13:30 - 15:00 write a vignette and build a package web page

15:30 - 17:00 submit a package to CRAN

Preliminaries

Introductions

Isabella Gollini

@IsabellaGollini

Heather Turner

@HeathrTurnr

Your turn

This means that you
have to work!

This course is very hands on, and while we're here to help you, the **best** resource is often the person sitting next to you.

- Introduce yourself to your neighbours. Who are you and what are you using R for?

Script

One off data analysis

Primarily side-effects

Package

Defines reusable components

No side-effects

Why make a reusable component?

- You want to **test** it
- You want to **generalise** it
- You want to **document** it
- You want to **share** it

The material is mostly drawn from

Women's coding workshop

<http://bit.ly/forwards-nz>

December 2017

Hadley Wickham,
Jenny Bryan,
Di Cook

... that was mostly drawn from

<http://r-pkgs.had.co.nz>

<https://amzn.com/1491910399>

The bad news:
It's going to be
frustrating

The good news:
Frustration is
typical and
temporary
